DETAILED ACTION

Response to Amendment

1. This communication is in response to the Amendment filed on 19 January 2010.
2. Claims 1, 5, 9, 16, 22, 38 and 39 are currently pending. In the Amendment filed 19 January 2010, claims 1, 5, 9, 16 and 38 are amended and claims 2-4, 6-8, 10-15, 17-21 and 23-37 are canceled. As a result of the Amendment filed 19 January 2010, claims 1, 5, 9, 16, 22, 38 and 39 (renumbered as 1-7) are allowed.

35 USC § 101 – Clarifications

3. Claims 1, 5, 9 and 38 are directed towards a computer-readable storage media. It is noted that the examiner construes the media as being limited to media which meet the requirements of statutory subject matter under 35 USC 101.

Allowable Subject Matter

4. The following is an examiner's statement of reasons for allowance:

In the Examiner's Non-Final Office Action dated 7 January 2009, claims 1, 5, 9, 16 and 22 were rejected under 35 USC 103 based primarily on US PGPub 2002/0120561 to Chin et al, US Patent No 5,787,443 to Palmer et al and US PGPub 2005/0075955 to Milovina-Meyer et al.

The claimed invention is directed towards a method and a system for an importer using a software user interface to audit entry packets submitted by a broker by comparing information in a broker database and information in scanned images

received from the broker with corresponding records of the importer.

The prior art of record, Chin, Palmer and Milovina-Meyer, do not show, teach or suggest an importer performing Harmonized Tariff Schedule auditing including the combined limitations of **scanned images of entry packets relating to products imported by the importer which the customs broker assembled and submitted to U.S. customs, each entry packet including at least one commercial invoice, at least one shipping manifest, and at least one U.S. customs form which the customs broker prepared and which sets forth an HTS code and a duty; the importer linking the scanned images and the information in the broker database to corresponding records of the importer about the products in a second repository in the importer database; the importer comparing information in the scanned images with the corresponding records of the importer; and the comparing including comparing an HTS code on one of the customs forms with an HTS code with the corresponding records of the importer**, in combination with the other claimed features.

While Chin and Milovina-Meyer discloses the concept of providing customs information to interested parties through the use of an online database and email, Chin and Milovina-Meyer fail to explicitly disclose the concept of the importer receiving scanned images of the information filed by the broker. Palmer fails to overcome the deficiencies of Chin and Milovina-Meyer in regards to this limitation. While Palmer discloses the auditing of data records, Palmer fails to explicitly disclose an importer comparing scanned images with records of the importer and a broker database.

Therefore, the combination of Chin, Milovina-Meyer and Palmer fail to disclose the claimed invention as a whole.

An updated search for prior art on the EAST database and on domains (NPL-Google and ACM) has been conducted. The prior art searched and investigated in the database and domains does not fairly teach or suggest the teaching of the claimed subject matter as described above and reflected by the combined elements in independent claims 1 and 16. Dependent claims 5, 9, 22, 38 and 39 are indicated as being allowable for the same reasons stated above in regards to the independent claims.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
